## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of the restriction requirement in the reply filed on 3 February 2005 is acknowledged. The traversal is on the ground(s) that the examiner has not shown undue burden if the claims were examined together. This is not found persuasive because searching through thousands of patents for three patentability distinct inventions, and the patentability determination thereof, does indeed, present a serious burden on the examiner.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 4-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3 February 2005.

### ***Specification***

3. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph.

Examples of some unclear, inexact or verbose terms used in the specification are: page 2

line 9 "b", line 17 "th", line 20 "sinc", etc.

***Claim Objections***

4. Claims 1-3 objected to because of the following informalities: In claim 1 line 3 "thos" should be --those--, in line 4 "angl" should be --angle--, in line 9 "wh l" should be --wheel--. Appropriate correction is required.

***Allowable Subject Matter***

5. Claims 1-3 are allowed.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose electric power steering systems including multiple resolvers.
